Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner and the Applicant's representative discuss how to overcome 101 rejection in claims 1, 21 and 29. The examiner suggests to add tangible results, such as outputting in claims 1, 21 and 29 as long as it is supported by the original disclosure. The Applicant representative proposed two ways to overcome 101 rejection in claim 21 and the examiner prefers the first way of adding volatile/non-volatile memory in the claim instead of deleting light wave in the specification. The examiner noticed that proposed claim 1 further limits the identifier by adding manufacturer/type/serial information and database. The examiner needs to update search/consideration on these new limitations.
